

Ridgely Trimmer Co.
Springfield, Ohio
1941

New Challenge Trimmer

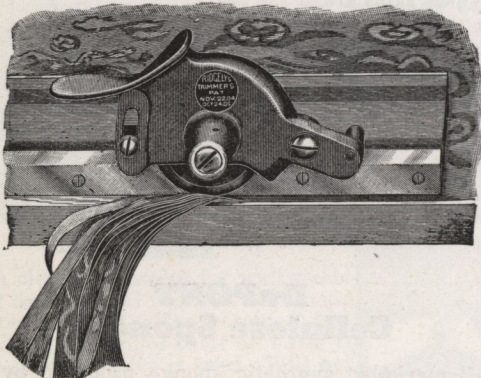

At last we are able to offer our customers from coast to coast a light weight mechanically perfect trimmer. Its smoothness of operation is almost unbelievable, but the minute you lay your hands on it you will realize that it is a precision instrument. Never again, if you obtain one, will you experience a wobbly looseness or a jerky tightness when cutting, for, this Trimmer has perfect alignment in the blade.

When used with the new screwless straight edge it is practically foolproof. Its construction is simple, yet efficient. It is made from best quality aluminum, highly nickeled.

The Challenge, we believe is an excellent investment for every mechanic.

Trimmer only.....\$3.25

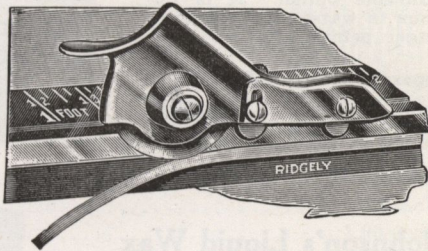

Ridgely's Model D Trimmer

This trimmer which for many years has been considered as standard by leading mechanics, is made entirely of steel and measures 5 inches long. It can be used only in conjunction with a No. 4 or No. 10 straight edge, because it is constructed with a steel clip guide which runs on the brass track of the straight edge with the trimming wheel closely hugging same, thereby insuring a perfectly true cut, which is very important when doing butt work.

Trimmer only.....Net \$3.00

The Master Trimmer

The new Ridgely Master Trimmer is an outstanding achievement as you will notice the minute you slide it down a straight edge. It travels on a bronze bearing. The cutter turns on a patented bearing axle and zips its way through the paper true and easy. It travels the brass without the usual side sway or wobble. It is equipped with the latest blade bearing assembly which insures long life and freedom from trouble.

Genuine Ridgely Folding Trestles

The Best That Can Be Made

This folding trestle is made from selected hard maple. The horizontal piece on which the boards rest has four notches into which fit the ends of the two legs which are not permanently joined, making it possible to adjust the table to four different heights between 30 and 34½ in. without the use of pins for support. Each trestle is equipped with a hook to accommodate the straight edge when not in use. Weight about 5 lbs.

The Ridgely Folding Paste Table

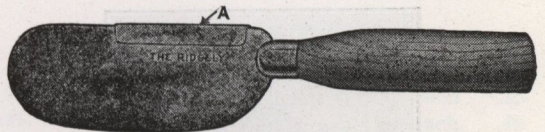

No. 314. This folding paste table is unusually solid, because the legs which are placed at a slight angle to the top to prevent table from creeping, are reinforced in every direction by steel braces as shown in illustration. There is a convenient place for surplus paper between the diagonal braces and the legs. When folded there is plenty of space inside for straight edge and other tools. The top is made from selected kiln dried lumber free from knots and measures 22 in. in width.

RIDGELITE SEAM ROLLERS

Do Not Flash or Polish the Seam

All seam rollers in this column are made from a patented composition which is hard as stone, tough as leather, and smooth as glass. The axle to which the handle is fastened, is moulded right into the roller, thereby preventing it from running out of true, which is characteristic of wood and celluloid rollers. The corrugated surface of roller overcomes flashing or polishing of seam.

There is no short cut to Quality and Service

Extension Planks

The strips for these planks are made of finest grade Southern pine firmly ironed. The construction is such so as to eliminate spring and sidesway, thus affording a firmer footing for the mechanic.

6 ft. long closed, ext. to 10½ ft., each	Net \$3.75
8 ft. long closed, ext. to 13½ ft., each	Net 5.00
10 ft. long closed, ext. to 17½ ft., each	Net 7.25

Painters' Toothpick Stages

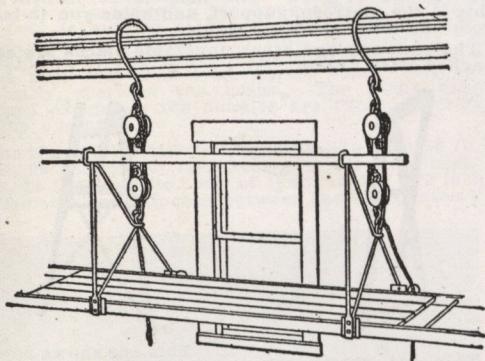

Made of clear fir sides and hickory rungs secured with long wire nails. Tested to carry weight of 2 men, or about 350 lbs. Flooring ½"x3½". Surface rough

Price each—12" wide

10 ft.	\$6.00	*18 ft.	\$13.50
12 ft.	7.20	*20 ft.	15.00
14 ft.	8.40	*22 ft.	18.25
16 ft.	9.60	*24 ft.	19.80

*Price includes special wire re-inforcing for safety.

Swinging Scaffolds

Only the highest grade of wood enters into the production of these stages. Clear Norway pine is used for sides and slats and hickory for the rungs. They are nailed in such a way so as to make them stand a lot of abuse.

Price each—20" wide

10 ft.	\$ 7.50	*18 ft.	\$14.85
12 ft.	9.00	*20 ft.	16.50
14 ft.	10.50	*22 ft.	19.80
16 ft.	12.00	*24 ft.	21.60

*Price includes special wire reinforcing for safety.

Guard rails, per ft. \$0.15

Painters' Falls

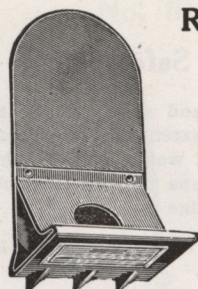

These falls are made of the best manila rope of the same grade as used by sea going vessels. Prices quoted below include the following items:

Sufficient rope for fall, one pair single and one pair double iron strapped blocks AND ONE SET OF GUYLINES.

The Bracket

Roof Bracket

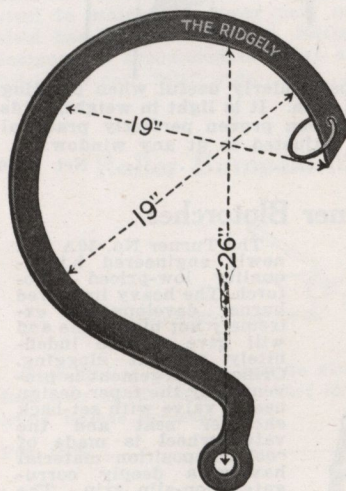

Showing Various Ways It Is Used

This bracket is adaptable to many uses, a few of which are clearly shown in the accompanying illustration. It is constructed from one single piece of heavy rolled steel.

Notice the three teeth which grab the shingles when weight is applied.

No. 601.....Net each \$0.70

Stage or Cornice Hooks

These hooks are manufactured from 2½ inch highest grade hand forged steel and have been tested to stand a weight of 1800 pounds which is far in excess of any load to which they will be subjected.

No. 94—Extreme length, 29 inches; clearance, 19 inches. Per pair Net \$6.50

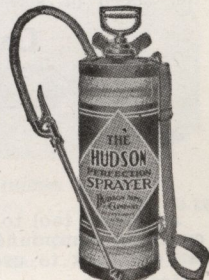

No. 96—Large size, 39 inches long with 21 inches clearance. Per pair Net \$7.25

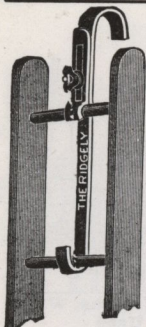

Hudson-Sprayer and Wall Paper Remover

For moistening wallpaper in order to remove it, nothing can beat this little machine. Adjustable to a spray, so fine that no water will run to the floor if applied uniformly. A few strokes of the plunger compresses enough air to spray a large area. Can also be used in applying cold water paints, glue size, etc. Four gallon capacity, complete with discharge hose and nozzle.

No. 131—Net, each..... \$5.50

Repair parts available.

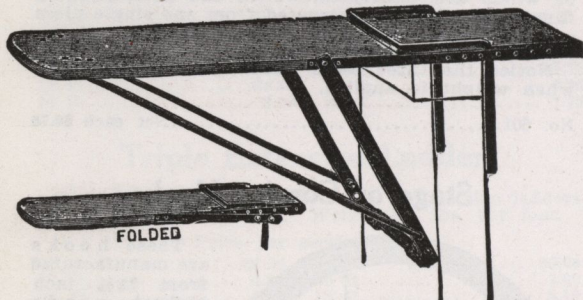

Adjustable Safety Hook

A convenient and safe device, attachable to any extension ladder, for use in doing roof work. The weight of the ladder keeps the safety hook firmly against ridge.

No. 605—Each Net \$0.55

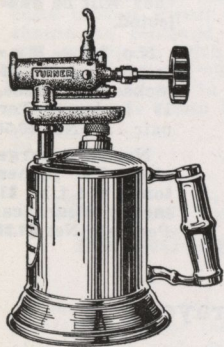

No. 287 Window Bracket or Jack

This bracket is particularly useful when painting window frames and sash. It is light in weight, folds up closely and has been proven perfectly practical and safe. Quickly adjusted to fit any window.

Each—4 ft. length Net \$6.50

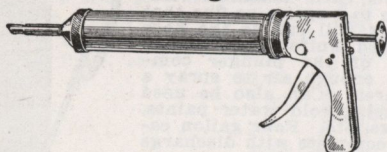

Turner Blotorches

The Turner No. 30A is a newly engineered high-quality low-priced blotorch. The heavy improved burner develops an extremely hot blue flame and will give service indefinitely without clogging. Orifice enlargement is prevented by the taper design needle valve with set-back shoulder seat and the valve wheel is made of cool composition material having a deeply corrugated non-slip grip. The safety-type pump is sturdy and efficient and is designed for convenient oiling and servicing; and the highly polished seamless brass tank is well set off by a smart red handle. Gasoline Fuel.

No. 30A—1 qt. size—4½ pounds Net \$3.75
No. 25A—1 pt. size—3¾ pounds Net 3.50

Caulking Gun

A perfect tool to do first class work in applying caulking compounds, liquid, or glazing putty. It is very easy to use and a big time saver.

Price, each.....Net \$3.50

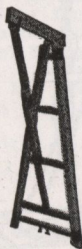

Ridgely Adjustable Folding Scaffolds

From a standpoint of efficiency and safety nothing can compare with this folding scaffold.

It is made of best grade Norway pine. The construction is rugged, but not so cumbersome so as to make it difficult to transport from one job to another. It is easily adjusted to any height between 6½ ft. and 10½ ft. The nose is 26 inches long. This is the platform support, and holds you 42 inches from the wall at full height.

The stairway and other ungetable places are easily reached with these.

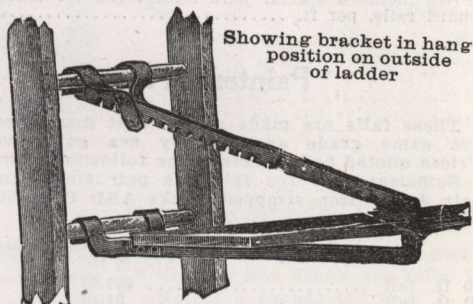

This cut shows one scaffold set up, and nose leaning toward you.

This cut shows how the steel braces look when attached to the scaffold when it is extended to its extreme length.

No. 6—Per pair Net \$22.50

No. 600 Ladder Brackets

Showing bracket in hanging position on outside of ladder

This is beyond a doubt the most popular and practical adjustable ladder bracket on the market. Can be used in various ways, on either side of ladder, by merely changing its position.

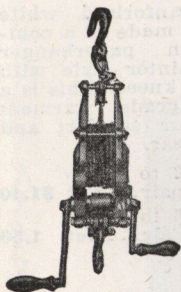

Built for extra safety from finest quality steel.

Per pairNet \$2.75

RIDGELY HOISTER

ONE OF THE GREAT ADVANCEMENTS IN
AMERICAN METHODS

The Ridgely Hoister is a small, powerful hoisting machine for painters, shipyards, building cleaners and bridge builders.

It is built for a lifetime of carefree service, made to resist rust, to add safety and convenience, and in the long run, economy to all who work from stages. Hoisters come with steel cable from 50 to 200 feet.

With this machine you wind your way quickly and safely to the level desired, knowing that it is locked against unwinding. In coming down you raise locking levers and turn handles backward, then brake goes into automatic action. When leaving

the work at night, remove handles and machine is locked.

THE CABLE

Each hoister contains a coil of one-quarter inch steel cable of requisite length, which has been tested and is guaranteed to sustain a ton, dead weight. The cable is treated to prevent rusting.

THE BRAKE FOR COMING DOWN

A metal brake-band encircling the brake-drum is in direct relation with the hook hanger, so that as the load is applied to the hook a braking force is proportionately applied to the brake-drum, and through it to the shaft. The operator's arms are freed from the dead load, as the load itself automatically operates the brake. The stage cannot descend except as the handles are turned backward by the operator.

The No. 383 Hoister weighs complete with 50 ft. of cable, 30 pounds. It measures over all from hook to hook, 24 inches. The body of the machine is 9 inches in diameter and 5 inches between the side-plates.

Note:—The above quotations are for single machines only. A pair (two separate machines) are required to swing a scaffold, one on each end.

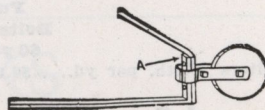

No. 615 Scaffold Irons

This type of scaffolding support has entirely replaced the old fashioned rope stirrups. The lower part on which the scaffold rests is made of $\frac{1}{2}$ "x1 $\frac{1}{2}$ " steel to which the upper part made of $\frac{1}{2}$ " round steel has been hot riveted. Notice the square bend designed to accommodate a 2x4 safety rail.

Price, per pair, 24 $\frac{1}{2}$ " wide \$8.50

Roller Bumpers No. 613

This Roller Bumper can be attached to any scaffold iron in two minutes. Not shipped with scaffold irons unless ordered.

Per pair Net \$2.25

All Steel Carrying Grip

These grips must be seen to be appreciated. Constructed entirely of metal, skillfully welded and reinforced throughout. Beautifully finished with three coats of olive drab baking enamel. Equipped with Yale lock and steel core leather handle.
